This collection of squadron histories has been prepared by the USAF Historical Division to complement the Division's book, Air Force Combat Units of World War II. The 1,226 units covered by this volume are the combat (tactical) squadrons that were active between 7 December 1941 and 2 September 1945. Each squadron is traced from its beginning through 5 March 1963, the fiftieth anniversary of the organization of the 1st Aero (later Bombardment) Squadron, the first Army unit to be equipped with aircraft for tactical operations. For each squadron there is a statement of the official lineage and data on the unit's assignments, stations, aircraft and missiles, operations, service streamers, campaign participation, decorations, and emblem. "Lasers will continue to play an important and sometimes dangerous role on the modern battlefield. At present, there is no adequate comprehensive protection against accidental or intentional exposure to lasers in combat. Thus, it is critical that the field of laser safety research develop preventative protocols and prophylactic technologies to protect the warfighter and to support military operational objectives. This book details the current state-of-the-art in scientific, biomedical, and technical information concerning the effects of military lasers on the human body. An important purpose of this book is to identify current knowledge gaps in the various areas of this interdisciplinary field, and to offer specific recommendations for laser safety research and development into the future"-- Presents professional information designed to keep Army engineers informed of current and emerging developments within their areas of expertise for the purpose of enhancing their professional development. Articles cover engineer training, doctrine, operations, strategy, equipment, history, and other areas of interest to the engineering community. The Other Side of the Mountain: Mujahadeen Tactics in the Soviet-Afghan War is a 1998 non-fiction book written by former Afghan Army Colonel Ali Ahmad Jalali and American military scholar Lester W. Grau. The book was commissioned by the United States Marine Corps Studies and Analysis Division to complement Grau's previous book, "The Bear Went Over the Mountain." Jalali and Grau had planned travel into Afghanistan to interview Mujahideen fighters in late 1996, but were forced to remain in Pakistan when a Taliban offensive campaign started to seize major portions of Afghanistan, eventually capturing Kabul on September 27. Jalali interviewed approximately 40 Mujahideen during the month which the authors spent in Pakistan and an associate, Major Nasrullah Safi, conducted interviews inside Afghanistan for two months to collect additional data. I've written this book to help you – the soldier – kill the enemy when you get the chance and, most importantly, come back home in one piece. To achieve this aim I've covered combat training from boot camp up to the level required of a Special Forces soldier. And then gone on to add a few tricks of my own. I've done a bit of soldiering (Northern Ireland, SAS deployments, Bush Wars in Africa, life as a merc) and been in my fair share of fire-fights. I've only been wounded twice and learnt from both occasions. I'm going to use my experience to teach you to play the game. I'm not going to teach you how to survive in snowy mountains for a month with only one tea-bag or how to kill a room full of people with only a toothpick. There are plenty of books that do that already. This book will teach you how to fight and survive war in the 21st century from the tools of the trade, to avoiding getting shot or blown-up, from surviving an interrogation to defending a position. This is a book not for the faint hearted. But then neither is war. In this

comprehensive, practical guide, award-winning photojournalist Stacy Pearsall offers the techniques, guidance, and inspiration needed to succeed in the dynamic and exciting field of photojournalism. Starting with an overview of photojournalism and her experience as both a combat and domestic photographer, Stacy covers the basics of preparing for assignments, discussing such key topics as selecting suitable attire for different environments, assembling essential camera gear, developing the right approach for a story, and honing your shooting technique. Beyond the fundamentals, Stacy then dives into the nitty-gritty details of photojournalism work, providing insights into living and working in harsh conditions, maintaining physical and mental health, and managing relationships with subjects. The book interweaves hundreds of Stacy's amazing photographs with stories of her experiences in the field, providing context for advice on everything from navigating unfamiliar locations, to properly exposing your images, to building innovative multimedia projects. Follow her into "the trenches" for the fascinating stories behind the shots, which show by example how to get the best photographs you can, even under the most challenging circumstances. Features stunning full-color images from some of the author's most dramatic moments as a photojournalist. Offers insights on preparing for long-term assignments, working in austere environments, and reintegrating into society after a project. Interweaves photography techniques with advice on interacting with subjects and creating compelling stories. To the Marines: Welcome to Golf Company and the next step in your journey to becoming part of the world's premier fighting force. Many have failed or never even attempted what you have accomplished thus far, take pride in that. However, your journey has just begun. At Marine Combat Training, we will train and educate you in the common combat skills necessary to operate within any environment. The basic skills you will learn were forged over two centuries of battles; they are timeless, and vital to yours and the Corps success, now and in the future. Our Combat Instructors will Lead, Teach, Mentor, and Guide every one of you, through a rigorous 29-day program of instruction. You will be taught by the most experienced, professional, and knowledgeable Staff Non-commissioned Officers and Non-commissioned Officers that the Marine Corps has to offer. These SNCO's and NCO's were hand-picked out of hundreds of applicants to come to the School of Infantry to be Combat Instructors. I highly encourage you to prepare your mind and body for this training, the knowledge you gain here will carry you throughout your Marine Corps career. During the training cycle, I expect you to commit yourself to your training and education by learning as much as you can from our Combat Instructors. Finally, when you graduate, I expect you to retain what you learned and uphold the time honored traditions of our Marine Corps. Remember that regardless of military Occupation Specialty, every Marine is a Rifleman first. Every Marine, regardless of his military occupation, is trained as a Rifleman. This concept has been around since the Marine Corps inception in 1775, when every man who volunteered was required to bring his own musket. In the early 1900s, as the Marine Corps grew and additional military occupations were created, the Commandant, General John A. Lejeune, ensured that every Marine, regardless of his Military Occupational Specialty (MOS), received marksmanship training. During the Korean War, the Marine Corps was the only service to create rifle companies entirely from cooks, drivers, and other non-infantry Marines. From this war, the proverbial saying, Every Marine a Rifleman was born. In the nineteen eighties, the Commandant, General Al Gray, recognized the need to train all Marines in more than just basic marksmanship, but in modern-day combat skills. The School of Infantry was assigned to conduct this training known as Common Skills because it is common to every Marine. These common skills allow every Marine, regardless of MOS, to act as Rifleman when called upon. MCT Battalion generates Marine Riflemen to possess a foundational understanding of, and their role in applying, the Marine Corps' warfighting ethos, core values, basic tenets of maneuver warfare, leadership responsibilities, mental, moral, and physical resiliency in order to contribute to the successful accomplishment of their unit's mission. New Rifleman Definition: A Marine Rifleman embodies the Marine Corps' warfighting ethos: offensively minded; lethal with their weapon mentally, morally, physically resilient; proficient in basic field craft; and possessing a foundational understanding of leadership and the basic tenets of maneuver warfare. CONTENTS: MCT Student Outline, 296 pages Student Preparation Guide, 10 pages MCDP-1 Warfighting, 113 pages Physical Training Playbook, 19 pages From the eighteenth century to today, US Army Rangers are the special group of men who have led the way in America's most troubled times. Their missions are fraught with danger and awesome responsibility. Here are stories of the Ranger Officers, whose names became associated forever with the men they commanded. From the French and Indian War to Iraq and Afghanistan, these brave men have led the way in war after war united by comradeship, courage, patriotism, and pride. This book sheds light on various ethical challenges military and humanitarian health care personnel (HCP) face while working in adverse conditions. Contexts of armed conflict, hybrid wars or other forms of violence short of war, as well as natural disasters, all have in common that ordinary circumstances can no longer be taken for granted. Hence, the provision of health care has to adapt, for example, to a different level of risk, to scarce resources, or uncommon approaches due to external incentives or requirements. This affects the practice of health care as well as its ethics. This book offers a panoramic overview on various challenges healthcare faces in extraordinary situations and provides new insights from practitioners' as well as from academic scholars' perspectives. Rob van Duis served two consecutive tours in Vietnam, on grueling and dangerous LRRPs - Long-Range Reconnaissance Patrols. The 'shadow warriors' deadly warfare games of silent covert scouting operations against the enemy deep in the bush could last a few weeks at a time. Although their task was to locate, spying out enemy positions and call in strikes, they invariably took part in ambushes and small scale raids. With numerous firefight missions under his belt, van Duis had become a skilled combat field operator. Once back stateside, he continued to hone his warfare field craft under the training of a highly-decorated former Army Green Beret officer, Dave Randall, who successfully served three Nam combat tours. With high-profile military connections, Randall is able to secure a government assignment to fight Communist Sandinista insurgents in Nicaragua along with other teams. It was into this hot cauldron of socio-political chaos, in late 1977 that recruited experienced fighting soldiers began to be inserted within Nicaraguan borders clandestinely to

fight the Sandinista rebels to avert a communist takeover so close to the U.S. border. Having recruited and trained a team of twelve experienced combat operators, van Duis being one of them, they are off once again taking the field as in Vietnam years in rough and unforgiving terrain striking fear and death to armed rebels with a vengeance. The story begins with Bravo Team's covert arrival into Nicaragua. Van Duis and his teammates hit the ground running as they battle Sandinista rebels deep in enemy territory. His team's first-full scale battle is to purge a peaceful countryside villa of the armed combatants that have besieged it. After a vicious door-to-door fight to clear the villa's dwellings of rebels, it takes all the firepower available to finally defeat the horde of insurgents, who have taken innocent villagers hostage in a dense woodland area. On another mission as a solo strike team, Bravo is inserted into a rebel-infested area to neutralize a weapons supply depot, but as happenstance would have it they are faced by an enemy force triple the size they anticipated. The hazardous assignment takes yet another unforeseen turn; as van Duis and team flee to the exfiltration point, they are faced with taking an injured young peasant girl to safety with armed Sandinistas on their heels. Van Duis provides an insider's look at the trauma of warfare's brutality. Each mission is depicted with the intensity that only a real participant can portray. Even as a trained and experienced warrior, in the face of hideous combat he is affected by what he witnesses; the catastrophic aftermath to the civilians caught in the chaos of war. The story takes the reader deep inside the cataclysmic combat action seen through the eyes of Rob van Duis, a member Strike Team Bravo. His and the team's direct actions are rendered in the thick of the hellacious and death-defying perilous missions. This real-life journal of agonizing anguish that takes a toll on the human body and spirit is based on actual events. Their warfare missions provide a realistic look at the traumatic bane of armed conflict and its terrorizing face and subsequent results as Bravo goes after Communist rebel camps and supply depots with one solitary mission agenda; to take down the enemy with as much deadly force required wiping them off the face of the map. Nothing short of complete sterilization of their target is acceptable. Bravo manages to overcome the odds with chilling and bristling fighting sequences that puts the reader's mind in the very midst of terrifying clashes; close enough at times to see the whites of the enemy's eyes before death overtakes the fallen. Nothing is as dramatic as actual in-your-face combat action up close and personal. Volume 2, Bringing Order to Chaos: Combined Arms Maneuver in Large Scale Combat Operations, opens a dialogue with the Army. Are we ready for the significantly increased casualties inherent to intensive combat between large formations, the constant paralyzing stress of continual contact with a peer enemy, and the difficult nature of command and control while attempting division and corps combined arms maneuver to destroy that enemy? The chapters in this volume answer these questions for combat operations while spanning military history from 1917 through 2003. These accounts tell the challenges of intense combat, the drain of heavy casualties, the difficulty of commanding and controlling huge formations in contact, the effective use of direct and indirect fires, the need for high quality leadership, thoughtful application of sound doctrine, and logistical sustainment up to the task. No large scale combat engagement, battle, or campaign of the last one hundred years has been successful without being better than the enemy in these critical capabilities. What can we learn from the past to help us make the transition to ready to fight tonight? CONTENTS By SUBJECT: Abdominal Primary Care Basic Wound Primary Care EENT Primary Care Infection Asepsis Sterile Technique Injections Medication Administration Orthopedics Primary Care Pharmacology Respiratory Primary Care Sick Call and Medical Documentation Skin Disease Primary Care Venipuncture The first book on tracking in a combat situation that includes suggestions for integrating visual tracking operations into existing military doctrine in addition to the boots-on-the-ground detail necessary for soldiers who perform those operations How to visually track an armed individual or group in a combat situation for the purposes of gaining intelligence, locating the enemy, and/or killing them Packed with photographs and carefully crafted diagrams A functional, readable manual for soldiers, trackers, military organizations, affiliates, and enthusiasts around the world Special Forces Sniper Skills is a hard hitting account of the men, weapons and techniques used to coldly eliminate high value targets on the battlefield. Though many books have become best-sellers through telling one side of the story – a sniper's experiences, a training manual or a weapons catalogue – none before have combined the whole spectrum of a sniper's life and skills into one gripping book. This book examines the role of the sniper, and the unique skills employed, when serving as part of a Special Forces unit including the British SAS, the US Navy Seals and the Russian Spetznaz. The book is illustrated with photographs of every aspect of the sniper's trade and stories from the real-life experiences of the author's comrades: men who have served in almost every overt and covert conflict since World War II. The World's first Multi Platform Live Action Role Playing Game The sixth edition of the Kingdom of Praelia's universal rulebook brings all of the information to get started with a sports reenactment group including tips on how to craft your own foam weapons and armor. The adventures in this LARP game can be linked to the larger Meleeworld. Designed to play interchangeably with the table top system, Melee: The Eternal Adventure, the adventures can go from the field to the tabletop and back seamlessly. Time to take your foam larp to the next level with Melee: Culture, Crafts and Combat. Welcome to the land of Alluvium, where people from myriad cultures, across the sea of time, find themselves lost in a land where death is not a permanent condition. In the Kingdom of Praelia the adventure is eternal. Inside this book you will find Culture: A comprehensive guide to persona development, citizens, nobility, factions and guilds as well as other societies within the Kingdom of Praelia. Crafting: Techniques mastered over 30 years to create safe and realistic sports weapons and equipment for a safe yet competitive environment. Combat: Rules of engagement for safe contact sports reenactment that can be enjoyed by anyone - combative or otherwise This book is part of a series. This edition is the pocket sized field reference version. 'Fighting Scholars' offers the first book-length overview of the ethnographic study of martial arts and combat sports. The book's main claim is that such activities represent privileged grounds to access different social dimensions, such as emotion, violence, pain, gender, ethnicity and religion. In order to explore these dimensions, the concept of 'habitus' is presented prominently as an epistemic remedy for the academic distant gaze of the effaced academic body.

The book's most innovative features are its empirical focus and theoretical orientation. While ethnographic research is a widespread and popular approach within the social sciences, combat sports and martial arts have yet to be sufficiently interrogated from an ethnographic standpoint. The different contributions of this volume are aligned within the same project that began to crystallize in Loïc Wacquant's 'Body and Soul': the construction of a 'carnal sociology' that constitutes an exploration of the social world 'from' the body. Their lifestyle of hunting for sport and profit honed the Boers' skills of field-craft, horsemanship, and marksmanship, making them a formidable force in the field and well suited to guerrilla operations. This book describes the life and combat experiences of a typical Boer in this key period. Using meticulously researched analysis and comment, and the experiences of a composite character, Johannes de Bruyn, a revealing portrait of Boer life and military operations is drawn. The actions at Laing's Neck, Majuba, the Zulu Civil War and the Second Anglo-Boer War are covered in this packed and informative treatment. The manual describes the general strategy for the U.S. Marines but it is beneficial for not only every Marine to read but concepts on leadership can be gathered to lead a business to a family. If you want to see what make Marines so effective this book is a good place to start. The Combat Medic of today is the most technically advanced ever produced by the United States Army. Such an advanced technician requires an advanced teaching and learning system. 68W Advanced Field Craft is the first textbook designed to prepare the Combat Medic for today's challenges in the field. The ability to save lives in war, conflicts, and humanitarian interventions requires a specific skill set. Today's Combat Medic must be an expert in emergency medical care, force health protection, limited primary care, evacuation, and warrior skills. 68W Advanced Field Craft combines complete medical content with dynamic features to support instructors and to prepare Combat Medics for their missions. This study seeks to clarify the nature of light infantry. General characteristics of light infantry forces are identified, and an analysis of how light forces operate tactically and how they are supported is presented. In the process, the relationship of the light infantry ethic to its organization is evaluated, and the differences between light infantry and conventional infantry is illuminated. For the purpose of this study, the term conventional infantry refers to modern-day motorized and mechanized infantry and to the large dismounted infantry forces typical of the standard infantry divisions of World War II, the Korean War, and the Vietnam War. The study concludes that light infantry is unique and distinct. A light infantry ethic exists and manifests itself in a distinctive tactical style, in a special attitude toward the environment, in a freedom from dependence on fixed lines of communication, and in a strong propensity for self-reliance. The study is based on a historical analysis of 4 light infantry forces employed during and since World War II: The Chindits, in the 1944 Burma campaign against the Japanese; The Chinese communist Forces during the Korean War; British operations in Malaya and Borneo 1948-66; and the First Special Service Force in the mountains of Italy 1942-44. -- p. [2] of cover. Creating Military Power examines how societies, cultures, political structures, and the global environment affect countries' military organizations. Unlike most analyses of countries' military power, which focus on material and basic resources—such as the size of populations, technological and industrial base, and GNP—this volume takes a more expansive view. The study's overarching argument is that states' global environments and the particularities of their cultures, social structures, and political institutions often affect how they organize and prepare for war, and ultimately impact their effectiveness in battle. The creation of military power is only partially dependent on states' basic material and human assets. Wealth, technology, and human capital certainly matter for a country's ability to create military power, but equally important are the ways a state uses those resources, and this often depends on the political and social environment in which military activity takes place. This Leavenworth Paper is a critical reconstruction of World War II Ranger operations conducted at or near Djebel el Ank, Tunisia; Porto Empedocle, Sicily; Cisterna, Italy; Zerf, Germany; and Cabanatuan in the Philippines. It is not intended to be a comprehensive account of World War II Ranger operations, for such a study would have to include numerous minor actions that are too poorly documented to be studied to advantage. It is, however, representative for it examines several types of operations conducted against the troops of three enemy nations in a variety of physical and tactical environments. As such, it draws a wide range of lessons useful to combat leaders who may have to conduct such operations or be on guard against them in the future. Many factors determined the outcomes of the operations featured in this Leavenworth Paper, and of these there are four that are important enough to merit special emphasis. These are surprise, the quality of opposing forces, the success of friendly forces with which the Rangers were cooperating, and popular support. The Combat Medic of today is the most technically advanced ever produced by the United States Army. Such an advanced technician requires an advanced teaching and learning system. 68W Advanced Field Craft is the first textbook designed to prepare the Combat Medic for today's challenges in the field. The ability to save lives in war, conflicts, and humanitarian interventions requires a specific skill set. Today's Combat Medic must be an expert in emergency medical care, force health protection, limited primary care, evacuation, and warrior skills. 68W Advanced Field Craft combines complete medical content with dynamic features to support instructors and to prepare Combat Medics for their missions. The Foundation of All Survival Skills is "Feeder" Mind-Set "Feeder" mind-set means being in control of a situation, proactive rather than reactive. It is an optimistic outlook that reframes any situation as a learning experience. Kevin Estela teaches survival skills from this feeder-based perspective, which is what separates his teaching style from other wilderness instructors. Kevin has written the quintessential guide for an outdoor enthusiast's "bucket list" of skills—how to make a fire, build a shelter, gather food, find water, use a knife correctly and make cordage. These skills will keep you safe and better prepare you to deal with emergencies in the field, when you'll need the additional skills of signaling and communication, navigation and crisis first aid taught in this book. Each chapter concludes with more advanced techniques to build your skills in various challenging situations, with tips that even seasoned survival enthusiasts haven't thought of. 101 Skills You Need to Survive in the Woods is not a onetime read but a lifetime reference you will turn to over and over again. It will become the first thing you pack for any adventure and just might save you— or

someone else's—life. Kevin Estela, a bushcraft and survival expert, is an avid world traveler and martial arts instructor. Volume 5, *Deep Maneuver: Historical Case Studies of Maneuver in Large-Scale Combat Operations*, presents eleven case studies from World War II through Operation Iraqi Freedom focusing on deep maneuver in terms of time, space and purpose. Deep operations require boldness and audacity, and yet carry an element of risk of overextension - especially in light of the independent factors of geography and weather that are ever-present. As a result, the case studies address not only successes, but also failure and shortfalls that result when conducting deep operations. The final two chapters address these considerations for future Deep Maneuver.
