Grand in scope, rigorous in research, and elegant in presenting the formative years of our country, *Armed America* traces the winding historical trail of United States citizens' passion for firearms. Author and historian Clayton E. Cramer goes back to the source, unearthing first-hand accounts from the colonial times, through the Revolutionary War period, and into the early years of the American Republic. In *Armed America*, Cramer depicts a budding nation dependent on its firearms not only for food and protection, but also for recreation and enjoyment. Through newspaper clippings, official documents, and personal diaries, he shows that recent grandiose theories claiming that guns were scarce in early America are shaky at best, and downright false at worst. Above all, Cramer allows readers a priceless glimpse of a country literally fighting for its identity. For those who think that our citizens' attraction to firearms is a recent phenomenon, it's time to think again. *Armed America* proves that the right to bear arms is as American as apple pie. Kell is plagued by his guilt. Restless, and having given up smuggling, he is visited by dreams of ominous magical events, waking only to think of Lila. Writing with knowledge born of experience, conservative historian and former military officer Andrew J. Bacevich argues that if the nation is to solve its predicament, it will need the revival of a distinctly American approach: the neglected tradition of realism. In contrast to the multiple illusions that have governed American policy since 1945, he calls for respect for power and its limits; aversion to claims of exceptionalism; skepticism of easy solutions, especially those involving force; and a conviction that Americans must live within their means. Only a return to such principles, Bacevich eloquently argues, can provide common ground for fixing America's urgent problems before the damage becomes irreparable. *Ricochet* Confessions Of A Gun Lobbyist "Ricochet tells the truth. With each page I can hear the echo of footsteps down the Rayburn Building's marbled halls as Feldman tells the intimate story few know and even fewer survive." —Jack Brooks (D-Tex.), former Chairman, U.S. House Judiciary Committee "Ricochet casts an eye-opening spotlight on the shadowy world of behind-the-scenes gun politics. Is it accurate? Absolutely! I was there." —John Aquilino, former Director, NRA Public Education "Ricochet is right on target. Feldman's behind-the-scenes memoir vividly describes America's firearms debate and struggle to win in extraordinary detail. I thoroughly enjoyed it." —John W. Magaw, former Director of the Bureau of Alcohol, Tobacco, and Firearms With a new foreword: The New York Times—bestselling biography of President Lyndon Johnson from the Pulitzer Prize—winning author of *Team of Rivals*. Featuring a 2018 foreword by the Pulitzer Prize—winning political historian that celebrates a reappraisal of Lyndon Johnson's legacy five decades after his presidency, from the vantage point of our current, profoundly altered political culture and climate, Doris Kearns Goodwin's extraordinary and insightful biography draws from meticulous research in addition to the author's time spent working at the White House from 1967 to 1969. After Johnson's term ended, Goodwin remained his confidante and assisted in the preparation of his memoir. In *Lyndon Johnson and the American Dream*, she traces the 36th president's life from childhood to his early days in politics, and from his leadership of the Senate to his presidency, analyzing his dramatic years in the White House, including both his historic domestic triumphs and his failures in Vietnam. Drawing on personal anecdotes and candid conversation with Johnson, Goodwin paints a rich and complicated portrait of one of our nation's most compelling politicians in "the most penetrating, fascinating political biography I have ever read" (The New York Times). To London's aristocracy, the Inferno Club is a scandalous society of men no proper young lady would acknowledge. In private, they are warriors who would do anything to protect their king and country. In the ultimate battle of good versus evil, the Order's shadow war against the Prometheans reaches a crescendo; Drake Parry, Earl of Westwood, plays out a deadly masquerade to bring down the conspirators' dark cult from the inside. There are reasons for thinking that this is at last Indonesia's moment on the world stage. Having successfully negotiated its difficult transition to democracy after 1998, Indonesia has held three popular elections with a low level of violence by the standards of southern Asia. Recently its economic growth rate has been high (above 6 per cent a year) and rising, where China's has been dropping and the developed world has been in crisis. Indonesia's admission in 2009 to the G20 club of the world's most influential states seemed to confirm a status implied by its size, as the world's fourth-largest country by population, and the largest with a Muslim majority. Some international pundits have been declaring that Indonesia is the new star to watch, and that its long-awaited moment in the sun may at last have arrived. This exhaustive theology of missions focuses on theory and biblical mandates for missions as a vital part of theology. The theoretical foundations of design thinking and design in education are first examined by means of a literature review. This is then followed by chapters that characterize design thinking among children, pre-service teachers and in-service teachers using research data collected from the authors' design-driven coursework and projects. The book also examines issues associated with methods for fostering and assessing design thinking. In the final chapter, it discusses future directions for the incorporation of design thinking into educational settings. Intended for teachers, teacher educators and university instructors, this book aims to provide them with the theoretical foundations needed to grasp design thinking, and to provide examples of how design thinking can be interpreted and evaluated. The materials covered will help these groups of professionals to consider how design thinking can be integrated into their own teaching and learning contexts. The book will also promote a discourse between educational researchers on the theoretical development of design thinking in educational settings. New York Times Bestseller The Trump administration is remaking the government. It's Even Worse Than You Think: What the Trump Administration Is Doing to America tells us exactly how it is making America worse again. Bestselling author and longtime Trump observer David Cay Johnston shines a light on the political termites who have infested our government under the Trump Administration, destroying it from within and compromising our jobs, safety, finances, and more. No journalist knows Donald Trump better than David Cay Johnston, who has been following him since 1988. It's Even Worse Than You Think: What the Trump Administration Is Doing to America goes inside the administration to show how the federal agencies that touch the lives of all Americans are being undermined. Here is just some of what you will learn: The Wall. Mexican President Enrique Peña Nieto told President Trump that Mexico will never pay for the border wall. So, Trump is proposing putting a tariff on Mexican imports. But a tariff will simply raise the price of Mexican goods in the US, meaning American consumers will end up paying for the wall—if it ever gets built. Climate Change. Welcome to the new EPA, run by Scott Pruitt, a lawyer who has spent much of his career trying to destroy the agency he now heads. Secrecy reigns at the new EPA because Pruitt meets with industry executives to find out which clean air and clean water provisions they most want to roll back, and keeps staffers in the dark to make sure these pro-pollution plans don't leak prematurely. Stocking the Swamp. Contrary to his promise to “drain the swamp” in Washington, DC, Trump has filled his cabinet with millionaires and billionaires, from Treasury Secretary Steven Mnuchin, a Goldman Sachs and hedge fund veteran who made much of his fortune foreclosing on homeowners to billionaire heiress Education Secretary Betsy DeVos, who has already put the interests of bankers ahead of debt-burdened students and their families. The Kleptocracy. Under Donald Trump conflict of interest is passé. When Trump isn't in Washington, he stays at one of his properties, where the taxpayers pick up the tab for staffers, Secret Service, and so on, all at full price. And back in Washington, everyone now knows that the Trump International Hotel is the only place to stay if you want to do business with the administration. Meanwhile sons Donald Jr. and Eric run an eyes-wide-open blind trust of Trump holdings to avoid the appearance of conflict of interest—but not the reality. With more than three-quarters of a million copies sold since its first publication, The Craft of Research has helped generations of researchers at every level—from first-year undergraduates to advanced graduate students to research reporters in business and government—learn how to conduct effective and meaningful research. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to find and evaluate sources, anticipate and respond to reader reservations, and integrate these pieces into an argument that stands up to reader critique. The fourth edition has been thoroughly but respectfully revised by Joseph Bizup and William T. FitzGerald. It retains the original five-part structure, as well as the sound advice of earlier editions, but reflects the way research and writing are taught and practiced today. Its chapters on finding and engaging sources now incorporate recent developments in library and Internet research, emphasizing new techniques made possible by online databases and search engines. Bizup and FitzGerald provide fresh examples and standardized terminology to clarify concepts like argument, warrant, and problem. Following the same guiding principle as earlier editions—that the

skills of doing and reporting research are not just for elite students but for everyone—this new edition retains the accessible voice and direct approach that have made *The Craft of Research* a leader in the field of research reference. With updated examples and information on evaluation and using contemporary sources, this beloved classic is ready for the next generation of researchers. Michael Wolff, author of the bombshell bestseller *Fire and Fury*, once again takes us inside the Trump presidency to reveal a White House under siege. Just one year into Donald Trump's term as president, Michael Wolff told the electrifying story of a White House consumed by controversy, chaos and intense rivalries. *Fire and Fury*, an instant sensation, defined the first phase of the Trump administration; now, in *Siege*, Wolff has written an equally essential and explosive book about a presidency that is under fire from almost every side. At the outset of Trump's second year as president, his situation is profoundly different. No longer tempered by experienced advisers, he is more impulsive and volatile than ever. But the wheels of justice are inexorably turning: Robert Mueller's 'witch hunt' haunts Trump every day, and other federal prosecutors are taking a deep dive into his business affairs. Many in the political establishment - even some members of his own administration - have turned on him and are dedicated to bringing him down. The Democrats see victory at the polls, and perhaps impeachment, in front of them. Trump, meanwhile, is certain he is invincible, making him all the more exposed and vulnerable. Week by week, as Trump becomes increasingly erratic, the question that lies at the heart of his tenure becomes ever more urgent: Will this most abnormal of presidencies at last reach the breaking point and implode? Both a riveting narrative and a brilliant front-lines report, *Siege* provides an alarming and indelible portrait of a president like no other. Surrounded by enemies and blind to his peril, Trump is a raging, self-destructive inferno ? and the most divisive leader in American history. Scholars in international comparative education are calling for a new paradigm - a multi-level qualitative analysis of cross-national data. In response, this volume demonstrates the application of a multi-level analysis to qualitative data, based on case studies on civic education in 24 countries. This book offers a model of classroom discourse analysis that uses systemic functional linguistic theory and associated genre theory to develop a view of classroom episodes as 'curriculum genres', some of which operate in turn as part of larger unities of work called 'curriculum macrogenres'. Drawing on Bernstein's work, Christie argues that two registers operate in pedagogic discourse: a regulative register, to do with the goals and directions of the discourse; and an instructional register, to do with the particular 'content' or knowledge at issue. Each can be shown to be realized in distinctive clusters of choices in the grammar. The operation of the regulative register determines the initiation, pacing, sequencing and evaluation of the overall pedagogic activity. The book sets out its methodology in detail by reference to a number of classroom texts, and a range of school subjects. Overall, schools emerge as sites of symbolic control in a culture. Civic and citizenship education have emerged as major areas of discussion, debate and action regarding their place in the school curriculum in many nations. This text sets out to show the importance of citizenship education with examples and contributions from around the world. 17-year-old high school student Akira Tachibana is a girl who barely expresses herself. Whether he is comparing how students and historians interpret documentary evidence or analyzing children's drawings, Wineburg's essays offer rough maps of how ordinary people think about the past and use it to understand the present. These essays acknowledge the role of collective memory in filtering what we learn in school and shaping our historical thinking.
