Get the updated industry standard for a new age of construction! For more than fifty years, Olin's Construction has been the cornerstone reference in the field for architecture and construction professionals and students. This new edition is an invaluable resource that will provide in-depth coverage for decades to come. You'll find the most up-to-date principles, materials, methods, codes, and standards used in the design and construction of contemporary concrete, steel, masonry, and wood buildings for residential, commercial, and institutional use. Organized by the principles of the MasterFormat® 2010 Update, this edition: Covers sitework; concrete, steel, masonry, wood, and plastic materials; sound control; mechanical and electrical systems; doors and windows; finishes; industry standards; codes; barrier-free design; and much more Offers extensive coverage of the metric system of measurement Includes more than 1,800 illustrations, 175 new to this edition and more than 200 others, revised to bring them up to date Provides vital descriptive information on how to design buildings, detail components, specify materials and products, and avoid common pitfalls Contains new information on sustainability, expanded coverage of the principles of construction management and the place of construction managers in the construction process, and construction of long span structures in concrete, steel, and wood The most comprehensive text on the subject, Olin's Construction covers not only the materials and methods of building construction, but also building systems and equipment, utilities, properties of materials, and current design and contracting requirements. Whether you're a builder, designer, contractor, or manager, join the readers who have relied on the principles of Olin's Construction for more than two generations to master construction operations. The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government. This brief represents a comprehensive review of methods for estimating characteristics of the foreign-born population in the United States, specifically oriented toward characteristics by legal status. A variety of methods have been proffered over the past many decades, in a large variety of venues; this work brings them together, attempts to impart some order on the definition of "legal status," and describes strengths and deficiencies both in methods and in data. The authors have a combined 50 years of experience in both demographic and statistical methodology. August Busch IV, former CEO and family member to the Anheuser-Busch dynasty which created America's favorite beers, Budweiser and Bud Light, is featured in this unauthorized true story. Great events are witnessed by Pamela as August faces his unique challenges and reveals his humanity and overcomes persecutions. What is real? What is an illusion? Is what people say about you truth? How you see yourself? Or how other's perceive you based on their own limited perceptions? How do we determine our spiritual walk or judge another's when the material world is often such an illusion to ourselves and others. Welcome to Billions of Illusions: Book Two, which is the sequel to Billions of Illusions that has received such rave reviews about Pamela's spiritual adventures and journey. Module A History of Civil Affairs Introduction to the Army Command and Staff Structure Introduction to the Civil Affairs Force Structure Introduction to Army Orders Law of Armed Conflict Property Control Module B Introduction to Civil Affairs Briefings Introduction to CA Area Studies and Assessments Analyze Legal, Moral, and Cultural Obligations with Respect to CMO Introduction to CA SITMAPS and Overlays Introduction to the CMOC Introduction to Cross-Cultural Communications Introduction to Interpreters in Support of CMO Introduction to Other Organizations in Support of CMO Module C Introduction to CA Methodology Introduction to Foreign Humanitarian Assistance (FHA) Introduction to Populace and Resource Control (PRC) Introduction to Support to Civil Administration (SCA) Introduction to Nation Assistance (NA) Identify Concepts and Principles of Civil Information Management (CIM) Analyze Civil Military Operations Information Module D Analyze CMO Estimate Introduction to Force Protection Measures Introduction to Media Support during CMO Identify the basic steps involved I the Problem Solving Process Introduction to CMO Measures of Effectiveness Introduction to CA Transition Operations Acronyms Sample CMO Estimate Sample CA ANNEX to an Operations Order The two volume set CCIS 775 and 776 constitutes the refereed proceedings of the First International Conference on Computational Intelligence, Communications, and Business Analytics, CICBA 2017, held in Kolkata, India, in March 2017. The 90 revised full papers presented in the two volumes were carefully reviewed and selected from 276 submissions. The papers are organized in topical sections on data science and advanced data analytics; signal processing and communications; microelectronics, sensors, intelligent networks; computational forensics (privacy and security); computational intelligence in bio-computing; computational intelligence in mobile and quantum computing; intelligent data mining and data warehousing; computational intelligence. Internet of Things (IoTs) was rapidly developed during past years. Smart devices, such as smartphones, smartwatches, and smart assistants, which are equipped with smart chips as well as sensors, provide users with many easy used functions and lead them to a more convenient life. In this dissertation, we carefully studied the birefringence of the transparent tape, the nonlinear effects of the microphone, and the phase characteristic of the reflected ultrasound, and make use of such effects to design three systems, RainbowLight, Patronus, and BreathPass, to provide users with accurate localization, privacy protection, and authentication, respectively. RainbowLight leverages observation direction-varied spectrum generated by a polarized light passing through a birefringence material, i.e., transparent tape, to provide localization service. We characterize the relationship between observe direction, light interference and the special spectrum, and using it to calculate the direction to a chip after taking a photo containing the chip. With multiple chips, RainbowLight designs a direction intersection based method to derive the location. In this dissertation, we build the theoretical basis of using polarized light and birefringence phenomenon to perform localization. Based on the theoretical model, we design and implement the RainbowLight on the mobile device, and evaluate the performance of the system. The evaluation results show that RainbowLight achieves 1.68 cm of the median error in the X-axis, 2 cm of the median error in the Y-axis, 5.74 cm of the median error in Z-axis, and 7.04 cm of the median error with the whole dimension. It is the first system that could only use the reflected lights in the space to perform visible light positioning. Patronus prevents unauthorized speech recording by leveraging the nonlinear effects of commercial off-the-shelf microphones. The inaudible ultrasound scramble interferes recording of unauthorized devices and can be canceled on authorized devices through an adaptive filter. In this dissertation, we carefully studied the nonlinear effects of ultrasound on commercial microphones. Based on the study, we proposed an optimized configuration to generate the scramble. It would provide

privacy protection against unauthorized recordings that does not disturb normal conversations. We designed, implemented a system including hardware and software components. Experiments results show that only 19.7% of words protected by Patronus' scramble can be recognized by unauthorized devices. Furthermore, authorized recordings have 1.6x higher perceptual evaluation of speech quality (PESQ) score and, on average, 50% lower speech recognition error rates than unauthorized recordings. BreathPass uses speakers to emit ultrasound signals. The signals are reflected off the chest wall and abdomen and then back to the microphone, which records the reflected signals. The system then extracts the fingerprints from the breathing pattern, and use these fingerprints to perform authentication. In this dissertation, we characterized the challenge of conducting authentication with the breathing pattern. After addressing these challenges, we designed such a system and implemented a proof-of-concept application on Android platform. We also conducted comprehensive experiments to evaluate the performance under different scenarios. BreathPass achieves an overall accuracy of 83%, a true positive rate of 73%, and a false positive rate of 5%, according to performance evaluation results. In general, this dissertation provides an enhanced ranging and versatile authentication systems of Internet of Things. Through the magic of print-on-demand technology, this "nimble" guide to the work of best-selling author J. K. Rowling provides the latest news about the author and her works, updated whenever there are significant developments. Unlike a conventional book, for which editions are printed in quantity every couple of years, this "living book" goes through frequent "mini-editions" and is printed fresh whenever customers place an order. Purchasers are entitled to free PDF or LIT updates! Studies in American Tort Law introduces students to -- but is careful not to overwhelm them with -- law and economics. At appropriate junctures, economic issues are explored, as in connection with the negligence balancing test and the materials on damages, nuisance, and strict liability. The goal is not to view all of tort law through an economic lens, but to employ economic analysis when it is particularly useful. This approach allows professors from the law-and-economics school to use the materials in the text as a starting point for classroom discussions; those who eschew economic analysis can allow the economic commentary to stand on its own. Several features of the book are noteworthy: first, vivid, memorable cases are used as the primary vehicle for teaching torts, but special effort is also made to integrate statutory law into the text. In particular, careful attention is paid to the reflexive process through which judge-made law and legislation influence one another. Second, the significance of liability insurance is highlighted so that students come to appreciate the critical role that insurance plays in the resolution of real cases. Third, ethics notes are included throughout the book for the purpose of sensitizing students to the difficult ethical questions that practicing lawyers face each day. Fourth, the text explores a number of issues associated with the law and feminism movement that raised questions of social justice of concern to all lawyers. The second edition of Studies in American Tort Law is completely up-to-date. It includes 14 new principal cases, citations to almost 600 new decisions, and a rich selection of materials reflecting the numerous recent legislative changes to the law of torts. A fully revised second edition of the teacher's manual (Teaching Torts) and student study guide (Mastering Torts) will also be available. The Code of Federal Regulations is the codification of the general and permanent rules published in the Federal Register by the executive departments and agencies of the Federal Government. 'Beatson, Matthews & Elliot's Administrative Law' combines extracts from key cases, articles and other sources with detailed commentary. Aimed at undergraduates studying administrative law, it provides comprehensive coverage of the subject. This book is a comprehensive guide to the theory and practice of lighting. Covering the physics of light production, light sources, circuits and a wide variety of lighting applications, it is both suitable as a detailed textbook and as thoroughly practical guide for practising lighting engineers. This fourth edition of Lamps and Lighting has been completely updated with new chapters on the latest lamp technology and applications. The editors have called upon a wide range of expertise and as a result many sections have been broadened to include both European and US practice. The book begins with a description of the fundamentals of light, vision, colour and measurement. Part II, the main section of the book, deals with lamps and control equipment and includes descriptions of all lamp types in use today. Part III on lighting covers both interior and exterior applications. LEXX Unauthorized, Series 3 - It's Light and It's Cold. The continuing story of Kai, an undead assassin, Zev, a combination of love slave and cluster lizard, Stanley Tweedle, a hapless security guard and 790, a robot head, careening through space together in the LEXX, a stolen, planet destroying, biological warship shaped like a dragonfly. The third series sees a radical reinvention of the show into a thirteen episode serial, as the LEXX falls into a stationary orbit between two warring planets, Fire and Water, which contain a remarkable mystery. Special Bonus - A behind the scenes look at the principal Creators and Stars of the show. LEXX was one of the strangest and most wildly surreal space operas ever conceived, owing as much to Bunuel and Barbarella as to Star Trek and Star Wars. It was unique and unforgettable, mixing black comedy and absurdism with epic drama, and an astonishing visual sense. Backstage, the story of the creation of the series was even more extraordinary, a tale of regional Atlantic film makers, renegade artists, cult film makers, wild experimentation, Canadian cultural nationalism, German entrepreneurs, new computer generated imagery technologies and backstage chaos intersecting in wildly unpredictable ways, to create truly exotic images and stories. The product of years of research and dozens of interviews, this is a 'must buy' for any fan of the show itself or of science fiction movies television generally, and an eye opening insight into film and television production, especially Canadian and international productions.
