image processing, signal processing, multimedia systems, wireless technology and more A guide to enhance your safety on motorcycle riding. Holden versus Ford, Ford versus Holden, Red versus Blue, Blue versus Red, even the order in which you say these two precious words marks you for life as to which side of the white line you drive on. Going straight to the heart of what it means to be Australian, this book is a must-have addition to any Ford or Holden lover's bookshelf. Loyalty, faith, competition, love--is expressed through two brands of motor car. Never before has this nation-dividing topic been faced head on, and written about in such a detailed and humorous way. Some highlights include: comprehensive history of Ford and Holden research and development in Australia; extensive lists of all the Ford and Holden models released since the beginning of the twentieth century; the panel van craze that rocked the nation during the 1970s; the Great Race at Philip Island, Mt Panorama, and the glory days of Ford versus Holden racing victories; a compendium of facts and trivia of all things Holden and Ford; and falling in love with a car of your dreams. With over 200 photos and great design, Holden vs Ford is a full-throttle car book and the perfect Father's Day gift book.

Vintage motorcycle price guide covering 100 different motorcycle marques from 1901-1999. Has over 120,000 prices on a six point grading scale. Teaches people how to properly grade a motorcycle. Has a currency conversion chart from U.S. dollars to other currencies. Market analysis for "what's hot and what's not" for those investing in vintage motorcycles. Prices are updated each edition from real time sales data, collected by 350 experts world-wide, using sales, auctions, shows, swap meets, Ebay, dealer sale, and many other sources to gather hundreds of thousands of sale prices each year. 17th annual edition. This one-of-a-kind reference work provides essential data on some 10,700 manufacturers of automobiles, beginning with the earliest vehicle that might be so termed (Frenchman Nicolas Cugnot's steam carriage, in 1770) and covering all nations in which automobiles have been built--67 in all. Not an encyclopedia or collection of histories, this is instead a very complete registry providing essential facts about the manufacturers: complete name, location, years active, type(s) of vehicles built, and other basic data. Compiled during more than 30 years of research, this reference even lists companies that produced just one car. Any builder of passenger-carrying vehicles on at least two but no more than eight wheels, of any design, either mass produced or built as one-off specials, experimental cars, prototypes, or kit cars, is included. Builders of internal combustion, steam and electric powered vehicles are all covered; companies that built only trucks, buses, racing cars, or motorcycles are not included. From A.A.A. to Zzipper and Argentina to Yugoslavia, this is an astonishingly comprehensive resource. Replicating the original ORACLE study, this volume presents the findings of the second round of research, and documents the changes in primary education and teaching practice over the last twenty years. Awarded the Nobel Prize for Literature in 1969, Samuel Beckett's influence on 20th century fiction and drama is immeasurable. Published in conjunction with the RT (Radio Telef s ireann) Thomas Davis Lecture Series to mark the centenary of Beckett's birth, Samuel Beckett - 100 Years consists of thirteen essays by many of the foremost academics studying Beckett today. Literary luminaries such as John Banville and Anthony Cronin line up alongside philosophers Dermot Moran and Richard Kearney to delve into the psyche of the man responsible for classics such as

Murphy, Krapp's Last Tape, and Waiting for Godot, while actors Barry McGovern and Rosemary Pountney describe what makes his works so theatrical. The book is a challenging and serious look at Beckett's work and its impact on literature today. This text provides a collection of the original ideas of many of the leading engineers, scientists, and fusion energy specialists. The specific intent of the collection is to explore the possibility of using fusion energy in advanced and future propulsion systems so that suitable space transportation can be developed, enhanced, and perfected.
