convertible, and sedan pickup) and in two series (300 Deluxe and Malibu). The clean styling and extended production year saw sales at 86,307 units sold with the SS 396 Equipment option, the all-time high watermark. The SS 396 equipment option offered three engine packages: those with 325, 350, and 375 hp--the latter being available with an aluminum-head option (L89). Two SS 396-specific paint colors (Daytona Yellow and Hugger Orange) were available at a \$42.15 charge adding a splash of brightness to the color chart palette. In fact, they intended it to be anything but a ground-breaking car. It may have been conventional, and it may have used old-fashioned technology, but without a doubt the Chevelle was a very, very good car--one of the best of its era. Its body-on-frame design, though nothing radical, made it the perfect platform for harnessing the energy about to be unleashed in the coming horsepower wars. When the dust from the muscle-car era settled, the Chevelle, in LS6 form, reigned supreme as

the fastest American car ever built. Its stout full-perimeter frame ensured that the car would handle all that energy and still last for the long haul. The buying public appreciated the Chevelle's simple virtues and responded by making the car an unqualified sales success. In its first year, Chevrolet sold nearly 400,000 Chevelles, outselling the Ford Falcon by nearly 30 percent. When Chevelles disappeared for good after the 1977 model year, Chevrolet had produced over 7.2 million of them. The Chevelle was built to hold up to anything their owners could throw at them, and hold up they did. The Chevelle had such a high survival rate that today it is one of the most common cars seen at car shows across the country--and one of the most beloved.
