Since the creation of the first Penguin paperbacks in 1935, their jackets have become a constantly evolving part of Britain's culture and design history. Looking back at seventy years of Penguin, Phil Baines charts the development of British publishing, book cover design and the role of artists in defining the Penguin look. Flora and Henry are pawns in a game played by eternal adversaries Love and Death. Born a few blocks from each other and meeting years later when their mutual love of music sparks an even more powerful connection. Walk away before you are threadbare / Preserve your strength, preserve your curly hair / For others' use. Least I can do. / Let your fabric relax, snap back to mold / Another body and reveal its gold. A collection of 120 sonnets in eight parts, Trio reveals, frame by frame, a married fortysomething female narrator in love with two younger men - an intellectual and a dancer - and torn between the claims of body and mind. In the tradition of Renaissance sonnet sequences from Petrarch onward, the narrator's love objects are constantly before her eyes, and thus before ours, creating compassion, comedy, and desire. They are real and imaginary, opposite and complementary, present and unavailable, autonomous and dependent. Tolmie's characters circle and shadow one another in every dance, spinning until fantasy becomes flesh and entanglement. In immortalizing the beloved, she draws on the power of both poetic and human reproduction. Like the contact improvisation modern dance form that influences the collection, these poems are both expressive and analytical. Through a singular feminist revision of a traditional poetic form, they tell the story - sometimes raunchy, sometimes crushingly sad - of a strong protagonist and the predicament she's in. Do you love plants? Do you love crafting? Would you like to dye your own fabric, yarn or clothing? Learn the relaxing art of botanical dyeing with natural dyer, Rebecca Desnos. Connect with nature and open your eyes to the colour potential of plants. Discover how to: produce a wide palette of colours, including pink from avocados, yellow from pomegranates and coral from eucalyptus leaves; extract dye from just about any plant from the kitchen, garden or wild; use the ancient method of soya milk mordanting to achieve rich and long-lasting colour on plant fibres, such as cotton and linen; produce reliable colours that withstand washing and exposure to light. Abe Lincoln spoke many memorable adages. As the sixteenth president, he needed great wisdom to guide the country through the Civil War, preserve the Union, and end slavery. This nontraditional tribute to the president who brought the homespun demeanor and humor of his humble beginnings to the White House uses the alphabet to organize a wealth of information about his life and accomplishments. Filled with Lincoln's often humorous proverbs and witty cartoons by John O'Brien, this colorful book takes a thought-provoking look at Old Abe. According to Piaget, all higher-order thinking skills have their bases in activities involving concrete manipulation and observation. The third edition of this highly regarded collection of social studies activities continues to be based on the premise that children learn best through experiences and activities—learning by doing. It features new activities for each social studies category (geography, history, anthropology, sociology, economics, political science, and interdisciplinary). Three important new additions to the key elements of the easy-to-follow activity format make it easier for instructors to meet standards-based curriculum requirements:

A detailed treatment of National Council of Social Studies standards addressed; specific multiple intelligences addressed (also reinforced by a multiple intelligences section in the back of the book); and useful Web site(s) for group/individual research (URLs for sites that will expand or enrich the learning experience for the activity). By engaging pupils in meaningful, worthwhile social studies activities, instructors can emphasize the processes of learning rather than the products, resulting in a richly rewarding experience for pupils and teacher alike. An insider's in-depth training system for getting up to speed on Microsoft Publisher 2000. Instructs the beginning to advanced user on getting the most out of this popular publishing program. The CD-ROM contains movie style demonstrations of key procedures. When a crew of scurvy pirates take King Cupcake captive, there's only one person who can save the day: Princess Spaghetti! Captain Waffle may be the meanest pirate in the world, but he's no match for this feisty princess. A swashbuckling picture book written by Gillian Rogerson and illustrated by award-winning Sarah McIntyre. Famous inventors and the inventions they develop is a fascinating area of historical study that is usually far too advanced for young children. However, a Famous Inventors & Inventions Picture Book breaks that information down in a way that is interesting and engaging to young boys and girls. Instead of pages and pages of text that makes no sense to them, children can see a picture of the inventor alongside the invention they created. This helps to begin laying the foundation for this knowledge in children at a young age and may even spark their interest and imagination in this area. This is not that story. Jerome Hancock is Heidi Devine's guardian angel. Sort of. He's more of an angel trainee, in heaven's soul-rehabilitation program for wayward teens. And he's just about to get kicked out for having too many absences and for violating too many of the Ten Commandments for the Dead. Heidi, meanwhile, is a high school junior who dreams of being an artist, but has been drafted onto her basketball team because she's taller than many a grown man. For as long as she can remember, she's heard a voice in her head - one that sings Lynyrd Skynyrd, offers up bad advice, and yet is company during those hours she feels most alone. When the unthinkable happens, these two lost souls must figure out where they went wrong and whether they can make things right before Heidi's time is up and her soul is lost forever. Martha Brockenbrough's debut novel is hilarious, heartbreaking, and hopeful, with a sense of humor that's wicked as hell, and writing that's just heavenly. Habitual Entrepreneurs examines the scale of habitual entrepreneurship and uses insights from human capital theory and cognitive theories to present a theoretical case for distinguishing between different types of entrepreneurs with reference to their prior business ownership experience.
