Ford Taurus Feb 24 2023 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 29. Chapters: Mercury Sable,

Ford Taurus SHO, Ford SHO V6 engine, List of Ford Taurus models, Ford Five Hundred, Ford Taurus X, Ford SHO V8 engine. Excerpt: The Mercury Sable is a mid-size (model years 1986-2005) or full-size (2008-2009) upscale sedan car model created by the Ford Motor Company and sold under the Mercury brand. It served as a rebadged variant of the Ford Taurus, with a few cosmetic changes. The Sable was a milestone design for both Mercury and the entire American automotive industry, as well as a very influential vehicle in the marketplace, with Mercury assembling 2,112,374 cars during its first 20 years of production through 2005. The Sable's design was so futuristic, that it was called by the press "The car that came from the moon." An important feature of the Sable's design was its front "lightbar," a low-wattage lamp between the front headlamps. This later became mainstream for Mercury's lineup, and was copied by many automakers in the early nineties. The Sable was refreshed in 1992 and received its first complete redesign in 1996. The 1996 model remained the basis for the vehicle up through the 2005 model year. A major sheet metal and interior redesign occurred in 2000, softening some of the controversial design vestiges of the 1996 model which the Taurus also endured. Minor styling changes in 2004 further refined the car. The Sable station wagon ended production in 2004 and sedan production ended on April 29, 2005. The Ford Taurus remained in production through the 2007 model year, primarily for service as a fleet vehicle. Taurus production ended on October 27, 2006. At the Chicago Auto Show on February 7, 2007, Ford CEO Alan Mulally unveiled a refreshed version of the Mercury Montego sedan and announced that the new name of the car would be "Sable," due to customer recognition and dealer demand....

1992 Ford Taurus, Sable Service Manual Feb 12 2022

Ford D186 Platform May 23 2020 Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. Pages: 27. Chapters: Ford Taurus, Ford Windstar, Lincoln Continental, Mercury Sable. Excerpt: Lincoln Continental was a model name for a series of automobiles produced by the Lincoln division of Ford Motor Company from

1939 to 1948 and again from 1956 to 2002. Despite often sharing underpinnings with less-expensive Fords in more recent years, the Lincoln Continental had usually been a distinctively platformed and styled, highly equipped luxury car in the course of its long history. The flagship Lincoln model during most of its run, the Continental name conveyed special cachet in the product line. During the 1980s, the Continental was downsized from a full-size to a mid-size Ford Taurus platform; this introduced the Continental to a wider range of competition from Europe and Japan. After the Continental was discontinued in 2002, it was largely replaced by the Lincoln LS and eventually the Lincoln MKS.

The first Lincoln Continental was developed as Edsel Ford's one-off personal vehicle, though it is believed he planned all along to put the model into production if successful. In 1938, he commissioned a custom design from the chief stylist, Eugene T. "Bob" Gregorie, ready for Edsel's March 1939 vacation. The design, allegedly sketched out in an hour by Gregorie working from the Lincoln-Zephyr blueprints and making changes, was an elegant convertible with a long hood covering the Lincoln V12 and long front fenders, and a short trunk with what became the Continental series' trademark, the externally mounted, covered spare tire. They had front and rear transverse leaf springs and hydraulic drum brakes.
